## SUMMARY

I build solutions and solve technical problems with attention to detail and continuous learning. I'm looking for teams and projects where I can apply this and keep growing as a developer. I'm currently studying Systems Analysis and Development, and complement my education with outside coursework.

## EXPERIENCE

### Front-End Developer | Alemar Tecnologia

May/2025 - Aug/2025

- Developed responsive user interfaces using **React** and **TypeScript**, focusing on usability, maintainability, and industry best practices.
- Built reusable components, **integrated APIs**, and managed application state while maintaining clean and performant code.
- **Collaborated with designers and product teams to deliver solutions aligned with business requirements and development standards.**

### Full-Stack Developer | Reminix

2025

- Fully developed a web platform that allows users to create, customize, and share a personalized page about their relationship.
- Implemented **authentication**, **data management**, image uploads, **email delivery**, **user onboarding**, **third-party service integrations**, and **full English localization**.
- Integrated **Stripe** and **Mercado Pago** payment systems, using **webhooks** for automatic payment **validation** and real-time status updates.
- *To create a page for free, use the password "0800" during the creation process.*
- **Front-end: React, TypeScript, Tailwind CSS, Figma**
- **Back-end: Node.js, Express, Supabase (PostgreSQL), Stripe, Mercado Pago, Render**

### IT Technician | Freelance

2020 - Present

- Built custom computers according to client requirements and budgets.
- Diagnosed and resolved hardware and software issues using industry-standard troubleshooting methods and quality assurance procedures.
- Ensured optimal system performance, customer satisfaction, and minimized downtime.
